

Course Descriptions

Fire Alarm Inspection Test and Maintenance of Existing Systems

4 CEU Credits (TECFB)

This course presents the applicable content of the 2006 International Fire Code, 2002 NFPA-72, UL Standards and Manufacturers Instructions related to inspection testing and maintenance. The objective of this course is to facilitate proper inspection testing and maintenance of existing fire alarm systems. Code requirements, reports and forms and procedures will be reviewed. Common errors and proper methods and procedures will be presented. Common code violations will be presented enabling the maintenance technician to recognize deficiencies.

Fire Alarm Wiring Methods and Materials

4 CEU Credits (TECFB)

This course presents the applicable content of the 2008 National Electrical Code (NEC) including but not limited to Articles 250,300,645,725,760 and 800, the 2006 International Building Code (IBC), 2006 International Mechanical Code and Reference Standards (RS) therein including but not limited to 2002 NFPA-72 related to fire alarm system wiring methods and materials.
